## SECTION 5 - FIRE FIGHTING MEASURES

Flash Point: 27 C (81 F)

LEL: 1.00

UEL: 8.00

### Extinguishing media

#### Suitable extinguishing agents:

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. CO<sub>2</sub>, extinguishing powder or water spray may be effective.

**For safety reasons unsuitable extinguishing agents:** **CAUTION!** Use of water spray may be inefficient.

#### Unusual Fire and Explosion Hazards

Closed containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers.

#### Special hazards arising from the substance or mixture

Formation of toxic gases is possible during heating or in case of fire.

#### Advice for firefighters

During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention. Keep containers tightly closed. Isolate from heat, sparks, and open flame.

#### Protective equipment:

Full protective equipment including self-contained breathing apparatus should be used.

### Engineering Controls:

Appropriate engineering controls include ventilations systems, eyewash stations and emergency showers.

### Ventilation:

All application areas should be ventilated in accordance to OSHA regulation 29 CFR 1910.94, 1910.107, 1910.108. Remove decomposition products formed during welding or flame cutting on surface coated with this product. If baking, vent fumes.

### Work / Hygienic Practices:

Wash skin thoroughly before breaks and meals and at the end of work period.

### Respiratory Protection:

Use a NIOSH-approved respirator to prevent overexposure, when exposure exceeds occupational exposure limits (Section 8). Use either an atmosphere-supplying respirator or an air-purifying respirator for organic vapors in compliance with 29 CFR 1910.134, with provision for mist removal if conditions so indicate. If isocyanate compounds are present in spray applications or other situations which may produce inhalation exposures, use a respirator that is recommended or approved for use in isocyanate-containing environments.

### Eye Protection:

Safety eyewear including splashguards or side shields recommended.

### Protective Gloves:

Recommended. The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material should be based on consideration of the penetration times, rates of diffusion and the degradation.
